- HS-9300M-D mono USB version
- HS-9300D-D duo USB version

PRODUCT DESCRIPTION

This headset was developed for use in an office or call center environment. While developing this headset, we had those who are constantly in motion in mind. With its help, you can talk on the move even while you are searching for a document or photocopying. It is suitable for telephones (HS-9000) and softphone applications (HS-9300). The product's features include crystal clear audio, a noise-cancelling microphone and hearing protection. Using an optional cable, an EHS connection is possible (depending on the type of phone). The headset is comfortable and has an adjustable microphone boom arm and headband. It is made from durable material. A maximum of four headsets can be connected to the base unit, through which a conference call can be initiated. The state of the headset can be monitored by checking the LED lights. When connected to a landline phone, the microphone and speaker's audio can be adjusted to the optimal level.

Technical information

Speaking time	maximum 8 hours
Standby time	maximum 50 hours
Radius	maximum 120m (depending on the environment)
Functioning frequency	1.88-1.9 GHz
Battery	Lithium polymer
Lifespan	minimum 1000 charges
Temperature resistance	-0°C to +40°C.
Supply voltage	230 V/50Hz

Logistical information

Net weight	315 g
Gross weight	455 g
Size	97×75×120mm
Package size	170×80×200mm
Package contents	base unit headset power adapter telephone or USB cable
