

## HA-35-B

### personal conference speaker

The tool for effective personal and small group conferences

#### PRODUCT DESCRIPTION:

The portable HA-35-B speaker is the indispensable accessory for personal and small group conference calls. Connect your device to your PC, laptop or mobile phone using a USB cable or Bluetooth connection and enjoy the crystal clear audio! A headset or even an entire speaker system can be connected to the device using the 3.5mm jack socket found on the back of the device. Thanks to its built-in battery you can communicate wirelessly via Bluetooth. The Omni-directional microphone provides exceptional echo-free reception from any direction. The broadband speaker guarantees that the call audio is crystal clear. Also, it is important to note that if you choose to initiate a conference call for your business needs instead of travelling, you not only save time and money, but you also decrease your Co<sub>2</sub> emissions, protecting the environment.
